

From Tony Raynor in California, USA - 24 Jan 2017.

Dear Mike. I recently took my 1936 Le Mans to our local Vintage Plane and Car Show at Cable Airport in Upland, about 6 miles from my home. About 150 Classic cars were present and around

85 Vintage planes. We were lucky enough to win a Cable Airport Trophy, so I was glad to have waved the flag for Singers. The weather was great and it was a very enjoyable day into the bargain.

Cable Airport is the largest privately owned airport open to the public in the country, and was started in 1945 by Dewey and Maude Cable. The story of Dewey & Maude's achievements in building the airport can be found at www.cableairport.com, from which a 28.5 MB pdf file can be downloaded. The airport is presently owned and operated by their children and grandchildren.

All the best to you all, **Tony.**

This Fiat 600 came second to the Singer - what a lovely little car.

This Anglia, with a huge V8 engine, was the only other British car at the show - scary!

Packard Military Staff Car with snowy mountain backdrop.

A winged badge on the back of a Model A Ford - thought of you when I saw it!
